EDUCATION

MEng Computer Science (Software Engineering) - University of Sheffield 2024 – 2029
(Predicted 2:1)

Ontario Secondary School Diploma - KAI Global School 2022 – 2023

- Achieved an average grade of 93% across 8 modules.
- Recipient of Exemplary Effort Award for academic excellence and perseverance.

SOFTWARE PROJECTS

Meeting Cost Calculator | Software Hut Feb 2026 – May 2026

- Built a full-stack **Ruby on Rails** application in a team of six following **MVC architecture**, collaborating with an industry client to gather requirements and design application workflows.
- Implemented soft delete recovery, CSV import functionality, and an administrative settings system with dynamic filtering capabilities.
- Wrote comprehensive unit and feature tests achieving over 85% test coverage across all implemented features, ensuring reliability and regression coverage.
- Collaborated using **Git feature branching**, deployed application builds to a shared demo environment, and integrated **Sentry** for error monitoring.

Assessment Management Tool | System Design & Security Oct 2025 – Dec 2025

- Designed and developed a **Java Spring Boot** application for managing university assessment workflows, implementing **JWT**-based authentication and role-based access control.
- Modelled the system using **UML** class, ER, and state diagrams to define assessment lifecycle transitions and database relationships.
- Implemented domain logic using **Hibernate ORM**, mapping polymorphic assessment entities to a relational database schema.
- Structured the application using layered architecture principles across domain, service, and controller components to support maintainability and extensibility.

SORTS – Embedded AI Waste Sorting System | iForge Hack Day 2025 April 2025

- Engineered an embedded waste-sorting prototype integrating **ESP32-CAM**, **Arduino Uno R4 (C/C++)**, and a Python-based inference pipeline for real-time image classification.
- Developed the data processing pipeline in **Python**, integrating the Google Gemini API to classify waste from captured images.
- Integrated sensing, inference, and actuation components across embedded hardware and software subsystems.
- Delivered a functional prototype within a 6-hour multidisciplinary hackathon, awarded “**Most Adventurous Hack**”.

TECHNICAL EXPERIENCES

IT Representative | iForge Makerspace Jan 2026 – Jun 2026

- Provide technical support across software environments, hardware systems, and workstation configurations, diagnosing and resolving issues to maintain makerspace infrastructure.
- Troubleshoot system-level problems involving development tools, OS environments, and device integration.
- Assisting in the development of a next-generation training platform and makerspace website using **TypeScript**.

Software Engineer | Project Echo

Oct 2025 – Present

- Collaborated in a multidisciplinary team developing an Android companion application for an AI-assisted hearing aid device.
- Designed application workflows, interface prototypes, and accessibility-focused UI concepts using **Figma** through iterative team discussions and user-oriented design research.
- Developed frontend mobile interfaces using **Kotlin** and **Jetpack Compose**, implementing reusable UI components and navigation flows.
- Designed and implemented the application settings interface, focusing on usability and maintainable UI structure.

Product QA Intern | Kith AI Lab

Nov 2025 – Jan 2026

- Tested an LLM-powered prototyping platform across multiple user workflows, identifying functional issues, usability inconsistencies, and unexpected AI behaviours.
- Conducted A/B testing of AI agents, evaluating differences in outputs and behaviour across prompts and use cases.
- Reported reproducible bugs and testing findings through structured feedback and issue tracking using **Notion**.
- Collaborated with the product team during weekly review cycles to validate fixes and improve platform reliability.

TECHNICAL SKILLS

- **Languages:** Java, Python, TypeScript, JavaScript, Ruby, Kotlin
- **Frameworks & Libraries** Spring Boot, Hibernate, Ruby on Rails, React, Jetpack Compose, ROS2, NumPy
- **Software Engineering:** Object-Oriented Programming, Agile/Scrum, MVC Architecture, Responsive Web Design
- **Tools & Platforms:** Git, Docker, Linux, REST APIs, HTML5, CSS3. Bootstrap, Figma

CERTIFICATIONS

- IEUK 2025: Technology & Engineering (Bright Network)
- IBM MQ Developer Essentials (IBM)
